

WSW

Dear readers and business partners,

Today we would like to use our newsletter to show you how diversified the sector we are involved in is. What distinguishes our forge? How did it all begin and what do tradition and quality mean to our WSW company?

Join us on our journey through 60 years of Wilhelm Schulte Wiese drop forge company's history...

Yours Schulte-Wiese Gesenkschmiede Team

WSW

Tradition and Quality

We have been around for more than 60 years - WSW Gesenkschmiede Drop Forge in Plettenberg.

Our know-how? **Short decision and information channels mean close and efficient implementation of customer specific requirements** and their complete production in our own firm.

Our some 80 employees are trained in the latest technology and are in a position to act autonomously. Consistent and interdisciplinary advance planning are essential for ensuring high quality. Our employees have been especially trained to implement your idea optimally and without upheavals!

Every delivery of material received undergoes a **spectral analysis**. This way of working and thinking makes sure that we are the right people to contact, particularly where safety relevant components are concerned.

WSW

From your idea to the finished drop forging - An overview of data and facts

WSW builds **drop forgings** and **assemblies of forging components**. High quality - from all common steel grades! We also make the processing of high-alloy steels possible.

Our spectrum:

- Gross weight 0,2 kg - 90 kg
- Manufacturing length > 1.370 mm

Our batch sizes:

- Small and medium up to 50 thousand items per year

Our machinery:

- KGH 3,15 to.
- KGK 6,30 to.
- HOU 800 (8to.)
- DGH 13 to.
- DGH 16 to.

WSW

Mining – Quality for working under ground - From foundation to the present day

Since the year we were founded in 1957 we have been at home in the field of mining. Over the years we have gained a lot of expertise in this area and with increasing economic growth in this area we have become more and more efficient in this sector.

Our hallmark? **Forged flight bars** with a gross weight of over 100 kg!

WSW

Commercial vehicles and agricultural machinery - Modern technology and high quality for 60 years

From the sixties up to today! That is how long we have been producing drop forgings for the commercial and motor vehicles industry. We are particularly active in the **tow bars** for the motor vehicle market sector. Here we produce for renowned car producers! Thanks to our many years of experience with safety-related parts our employees can advise you competently and produce drop forgings of very high quality for you.

WSW

We lead the way - Rail and Railway technology

Since 2003 we have been producing **base plates** and **slide chairs** for railway technology, – completely machined and ready to install. A further glance at our portfolio – we also forge parts for rolling stock. A large part of this section accounts for our turnover from forging.

At the end of 2001 we received QM and UM (Environment management) certification as well as certificates (HPQ) from Deutsche Bahn (German Rail).

WSW

Machining - Hand in hand with WSW from development, to design and production of machines

For many years we have been **producing accessories for machinery and special machine construction**. From light to heavy ... 90 Kg gross weight? No problem for us! On our premises our qualified employees produce parts with a length of up to 1,370 mm.

New technology in a company imbued with tradition... thanks to our Andromat manipulators forging very heavy parts is no longer a problem for us nowadays.

WSW

From the **design** to the **ready-to-install component** - our technical sales department will be happy to carry out a feasibility analysis for you if you are interested.

If you have any technical questions, please do not hesitate to contact our technical sales department.
